

Northwind Analytics Company Profile

Northwind Analytics is a software company founded in 2018.

The company headquarters is in Berlin, Germany.

The chief executive officer is Maria Chen.

The company has 120 employees.

Main Product

The flagship product is Atlas Query Engine, a tool for searching private document collections. Atlas Query Engine was released in 2021.

Customers use it to ask questions about PDF files and internal reports.

How Atlas Works

Atlas splits documents into overlapping text chunks, converts those chunks into embeddings, and stores them in a vector index. When a user asks a question, Atlas retrieves the most relevant chunks and a language model writes an answer using only that retrieved context.

Support Policy

Customer support is available Monday to Friday from 09:00 to 18:00

Central European Time. The support email is support@northwind.example.

The annual subscription price for Atlas Query Engine is 2400 euros.
